

AHMAD LAZIM

ahmadlazim422@gmail.com | linkedin.com/in/ahmad-lazim-5b8302288 | github.com/Ahmadlazim-03 | ahmadlazim.site

Surabaya, East Java, Indonesia

Final-year Informatics Engineering (applied bachelor) student at Universitas Airlangga and a full-stack developer with 1.5+ years of experience building web, mobile and SaaS products. Experienced with Next.js, Laravel, Flutter, Go Fiber, PostgreSQL and DevOps (VPS, Docker, Cloudflare). I care about clean backends, maintainable architecture and UX that never makes users think twice. **Open to Software Engineer internships.**

EDUCATION

Universitas Airlangga

Applied Bachelor of Computer Science (D4 Informatics Engineering) | GPA: 3.30 / 4.00

Surabaya

Aug 2023 - present

- Expert Staff of Web Development, HIMTI UNAIR (2024-present)
- Relevant coursework: Advanced Backend, Cloud Computing, Machine Learning, Deep Learning

WORK EXPERIENCE

Start Friday Asia

Junior Software Engineer

Surabaya, Indonesia

Nov 2025 - present

- Built and maintained company profile sites for 6 brands on Squarespace: startfriday.asia, Kimaya Experience, Mayang Modest Wear, Surabaya European School, Actogenes and Ayam Gebuk Bang Zoela.
- Managed SEO and Google AI Overview (AIO) optimisation across all client websites.

Start Franchise

Full Stack Developer

Surabaya, Indonesia

Nov 2025 - present

- Built the SaaS platform and company profile of startfranchise.id, a franchise marketplace listing 130+ brands across 8+ categories (Next.js + PostgreSQL).
- Designed PostgreSQL tables for brands, categories, outlets, investment packages, partner leads, articles and users, powering filters by capital and break-even period.
- Built and released the Start Franchise mobile app (Flutter) on Google Play, on the same database.

EVOP Tech

Full Stack Developer (contract)

Surabaya, Indonesia

Jan 2025 - present

- Developed the Go Orbit company site with a training course marketplace and a built-in CMS so the client manages all content independently.
- Built JagadTix (jagadtix.id), a high-demand event ticketing platform: events, ticket tiers, orders, payments, promo codes and users.
- Deployed and maintained client apps on VPS servers with Docker and Cloudflare; represented EVOP at Airlangga Young Entrepreneur 2025.

RELATED EXPERIENCES

GitHub · Ahmadlazim-03

Software Engineer (personal projects)

Surabaya, Indonesia

Oct 2025 - present

- Built AI agent bots and workflow automations with n8n, Hermes and OpenClaw, including an AI agent that handles Start Franchise leads.
- Developed Go backend services (Fiber, microservices, GraphQL) and Python machine learning models (regression, SVM, Naive Bayes).
- Wrote scraping scripts that collect brand and outlet location data into structured tables for analysis.

HIMTI UNAIR

Expert Staff, Web Development

Surabaya, Indonesia

Dec 2024 - present

- Developed himtiunair.com, the Informatics Engineering study programme site, with Laravel in a team of three.
