Jombang, East Java, Indonesia

I am a final-year Informatics Engineering student at Universitas Airlangga and a full-stack developer with **1.5+ years of experience** building **web, mobile and SaaS** products, looking for a **Software Engineer internship**. Experienced with **Next.js, Laravel, Flutter** and **PostgreSQL, DevOps** (VPS, Docker, Cloudflare), and **SQL data management** with **Microsoft Excel**.

EDUCATION

Universitas Airlangga

Surabaya, East Java

Applied Bachelor of Computer Science (D4 Informatics Engineering) | GPA: 3.30/4.00

Aug 23 - Present

- Expert Staff of Web Development, Informatics Engineering Student Association (HIMTI UNAIR), 2024-now
- Relevant coursework: Advanced Backend, Cloud Computing, Machine Learning, Deep Learning

WORK EXPERIENCE

Start Friday Asia

Surabaya, Indonesia

Junior Software Engineer

Nov 25 - Present

- Developed and maintained company profile websites for 6 brands on Squarespace CMS, including startfriday.asia, Kimaya Experience, Mayang Modest Wear, Surabaya European School, Actogenes and Ayam Gebuk Bang Zoela.
- Managed SEO and Google AI Overview (AIO) optimization across all client websites to strengthen brand visibility in search results.

Start Franchise

Surabaya, Indonesia

Full Stack Developer

Nov 25 - Present

- Built the SaaS platform and company profile of startfranchise.id, a franchise marketplace listing 130+ brands across 8+ categories, with Next.js and PostgreSQL.
- Designed PostgreSQL tables for brands, categories, outlets, investment packages, partner leads, articles and users, powering filters by investment capital and break-even period.
- Developing the Start Franchise mobile app with Flutter on the same PostgreSQL database, scheduled for release in October 2026.

EVOP Tech

Surabaya, Indonesia

Full Stack Developer - Contract

Jan 25 - Present

- Developed the Go Orbit company profile website with a training course marketplace using Next.js, including a built-in CMS that lets the client manage all site content independently.
- Built JagadTix (jagadtix.id), a high-demand event ticketing platform with Next.js, with relational tables for events, ticket tiers, orders, payments, promo codes and users.
- Deployed and maintained client applications on VPS servers using Docker and Cloudflare.
- Represented EVOP as a startup team member at the Airlangga Young Entrepreneur (AYE) event in 2025.

RELATED EXPERIENCES

HIMTI UNAIR (Informatics Engineering Student Association)

Surabaya, Indonesia

Expert Staff, Web Development - Contract

Dec 24 - Present

- Developed himtiunair.com, the company profile website of the Informatics Engineering study program, with Laravel in a team of 3.

Personal Projects (github.com/Ahmadlazim-03)

Surabaya, Indonesia

Software Engineer

Oct 25 - Present

- Built AI agent bots and workflow automations with n8n, Hermes and OpenClaw, including an AI agent that handles Start Franchise leads.
- Developed backend services in Go (Fiber, microservices, GraphQL) and machine learning models in Python (regression, SVM, Naive Bayes).
- Wrote scraping scripts that collect brand and outlet location data into structured tables for analysis.

CERTIFICATION

- Junior Mobile Programmer (Pemrogram Mobile Pratama), BNSP - LSP Teknologi Digital, Nomor 62019 2514 3 0146517 2025, 2025
- Junior Mobile Programmer Training, VSGA Digital Talent Scholarship, Komdigi, Nomor 193105911160-24/VSGA/BLSDM.Komdigi/2025, 2025

SKILLS

- Hard Skill: Full-stack web development, mobile development, REST and GraphQL APIs, relational database design, DevOps, SEO and Google AIO optimization, AI agents and workflow automation.
- Data and Spreadsheet: SQL with PostgreSQL and MySQL (table design, normalization, JOIN, GROUP BY, aggregation), data scraping and cleaning, data import/export between databases and Excel/CSV, Microsoft Excel (tables, basic formulas, sorting and filtering).
- Software: Next.js, Laravel, Flutter, Go Fiber, PostgreSQL, MySQL, Docker, Cloudflare, Squarespace, n8n, Git, Microsoft Excel, Microsoft Office.
